

Artificial Marble.
Nine-tenths of the marble-topped tables and so on—that I might call furniture marble—seen in this country, are made of artificial marble, said a man in the trade.
Thousands of tons of this mock marble are made annually, and even men in the trade can scarcely tell the difference between the real and the false article, for the markings, or marbling, go wholly through the block, and are not merely superficial. The basis of the whole is a combination of limestone and chalk, which, chemically treated, can be made of any shade desired. The artificial marble in the rough is placed in a water bath, and upon this is sprinkled a sort of varnish, consisting of sequoia oil of iron, gum, and turpentine, and all manner of marbled designs are produced when the turpentine is broken up by the addition of water.
Any pattern of marbling can be produced to order. Once such pattern appears, the air is expelled from the block, and the colors are fixed by the immersion of the stone in sulphate and warm water baths, and then another bath of sulphate and zinc so closes up the pores and hardens the stone that it acquires the density of the natural article, and can be cut and polished in the same manner.—Ex.

Colonizing Alabama.
The Southern States Magazine has a special dispatch showing that recent sales of land along the Mobile and Ohio Railroad to Northern and Western people aggregate 40,000 acres. Of this amount 22,000 acres have been sold to a colonization company organized at Sioux City, Ia., which proposes to take active steps at once to settle people from Iowa and other western states on this tract. The land will be laid out for farming purposes with a town in connection with it for such settlers as prefer town life. This property is located about sixty miles north of Mobile.

A Syndrome of Menstrual.
Here are the names of the about the most common it, hysteresis, and hysterical woman kind—dyspepsia, biliousness, and constipation. What is the most successful way to attack and quell these united monsters? Take Hostetter's Stomach Bitter, and they will pull up stakes and make room for parts unobscured, leaving no trace behind. The Bitters also exterminate malaria, rheumatism and kidney trouble and nervous ailments.
If Satan ever laughs it must be at hysterics, and the greatest dupe he has.

FLORIDA BRIEFS.

ITEMS OF INTEREST GATHERED AT RANDOM.

News from all Parts of the State Summarized.

Quite a number of people in South Alabama are talking Florida, and a number of families are coming this fall.

Part of the timber for the new dock at Georgetown is on the ground, and Messrs. Welty & Wagoner are receiving the iron rods and bolts ordered to be used in its construction.

The office of the South Florida railroad, in Thor City, was broken into recently and a lot of tickets, punches and cash drawer was, for some reason, undisturbed. It contained \$150. The loss of the tickets was the most serious part of the burglary, as their absence put Mr. Castings, the agent, to considerable inconvenience.

Amid the general depression, Stetson university, at DeLand, has gone steadily forward and is about to enter upon a new year with better prospects than ever before. There has been no intention of retrograding or even remaining stationary. The lines have been extended and broader plans formed, notwithstanding the fact that retrenchment seems to be the order of the day.

Robert C. Scott, ex-city treasurer of Jacksonville, whose trial on the charge of embezzling city funds occupied four days, has been acquitted. The specific ground upon which Scott was tried was the alleged embezzlement of a check of \$2,000 which the S. F. & W. railroad had paid for taxes. There are five other cases of a similar character against Scott, but they will not be pushed.

There was a meeting of the Coleman Fruit and Vegetable Growers' association a few days ago at Coleman. The question of fertilizers was discussed. Letters were read from different manufacturers and dealers. They finally agreed to use cotton seed meal, kaint and phosphoric acid, equal parts. This is said to be a complete fertilizer for cabbage on stiff clay soils, and will cost, purchased in car-load lots, after being mixed, about \$18 per ton.

Business in the United States land office at Gainesville during the month of August, came up to about the usual average. Thirty-two final proofs, embracing 4,405.35 acres, were made; homestead entries, ninety-two, embracing 10,349.73 acres of land. On commuted homesteads there were paid \$327.55. The cash sales made by order of the commissioners amounted to \$329.73; commissions paid upon homestead entries and final proof, \$1,078.19. A large increase in the business of the office is expected as soon as the naval reserve lands have been advertised the required time and are opened for entry.

Messrs. John and Herbert Johnson, of St. Andrews Bay, have constructed a twenty-foot boat called Gospel Ship No. 1, and now have commenced Gospel Ship No. 2, a forty-foot boat. They have secured donations from various parts of the United States to develop their consecrated home mission enterprise. The small boat is used for mission work on the bay; the second will coast along the gulf. Rev. C. E. Smith, a noted preacher of Marlboro, Mass., and Rev. J. A. Cargile, of Stevenson, Ala., a great debater and southern evangelist, will join the fleet in December, and hold their gospel meetings in a large tent. This is a worthy enterprise, and should receive the encouragement of all persons who believe in evangelizing the world.

This year's experience will teach an important lesson to the pear growers. They must learn to regard the pear crop as the people of the north do their apples—an excellent money crop if properly husbanded. The LeConte never yields less than a third of a crop and never before failed to be profitable. Yet there will occur a surplus in future years occasionally on account of the large plantings, and the people should be prepared to take care of these surpluses at home. The first shipments were made about June 25, and there are yet hundreds of bushels hanging on the trees, richer and sweeter than they were two weeks ago. Where the trees are properly fertilized with potassic manures the fruit has staying qualities which were never before suspected.

Named by the Governor.
Governor Mitchell has made the following civil appointments: R. H. Wilson, of Roberts, to be inspector of timber and lumber in and for the county of Escambia; W. H. Tucker, of Judson, to be justice of the peace for the Tenth district of Levy county; Frank H. Davis, of Thonothosa, to be notary public for the state at large; G. E. Walker, of Bartow, to be supervisor of registration for Polk county; Lucius C. Eldrid, of Anoka, to be justice of the peace for district No. 18, Brevard county; Geo. F. McDonnell, Bronson, to be justice of the peace for district No. 14, Levy county; Isaac W. Rogers, Bronson, to be justice of the peace for district No. 2, Levy county; H. C. Pickett, of Callahan, to be justice of the peace for district No. 5 of Nassau county.

A Railroad Sold.

The railroad, rolling stock, machinery and franchise of the Jacksonville, Mayport and Pablo Railway and Navigation company was sold at legal sale in front of the court house at Jacksonville by R. S. Cockrell, special master, for \$20,100. The property was bid in by J. N. C. Stockton. The bidding was started at \$8,000 by Mr. Stockton. He was followed by G. P. Haney, representing George Lewis, the Tallahassee banker, who bought in the issue of \$20,000 bonds issued by J. L. Marvin, appointed receiver in the United States court by Judge Swaine, and which were afterwards declared null and void by Judge Nease upon

the case coming before him when Jacksonville was taken in the southern district. The bidding ran up to \$20,000, when Mr. Haney dropped out and Mr. Stockton bid another \$100, and it was knocked down to him.
As the matter now stands, Mr. Lewis holds \$20,000 of receiver's certificates that the courts have held were unauthorized.

Drawing the Color Line.
It is almost certain that the Freedmen's Aid society and the American Missionary society will join forces and, in the United States court, fight the enforcement of the law passed by the last legislature to prevent the mixing of whites and negroes in the schools of the state. If the law is enforced, and is found to be sound, there will have to be radical changes made in the Boylan Home, of Jacksonville, or it will not be permitted to run. The Boylan Home is a school where negro children are taught by white teachers. J. S. Hartzell, corresponding secretary of the Freedmen's Aid society, wrote to Mr. Sheats and asked him to construe the law as to its application to the Boylan Home. The following was the reply:

DEAR SIR—Yours of June 18th received. I waited for reply, in order to get a printed copy of the law you wished me to construe, which find attached.

You can construe the law to suit yourself. It is my opinion that the word "persons" in section 1 intended to apply to teachers and pupils, as the intent of the law is to nip in the bud social equality and miscegenation that such schools are calculated and possibly are intended to inaugurate in this part of the country.

Those of us who love the Anglo-Saxon race and this great American republic are willing to do almost anything to preserve race purity, and to save the South from the spectacle witnessed in Hayti, Jamaica, Mexico and wherever there are no race distinctions.

We believe in the education of the negro—our works testify as to our faith—but we do not believe in the elevation of the negro at the cost of the degradation of our own race.
In many sections of the south the blacks are largely in the majority. You are philosopher enough to know what must be the final result of your nefarious doctrine of co-education of the races and of social equality. If the negro must be educated with the whites, I sincerely pray that it will only be done north of the Ohio, where the whites will outnumber them. This doctrine of social equality, especially as it is enforced upon the helpless school children, is the only animosity I bear the north; in every other respect I admire her institutions and her enterprise, especially her educational and religious labors and enthusiasm.

Yours truly,
(Signed) WM. N. SHEATS,
State Superintendent.

NORTON HANGED.

Pays the Penalty for the Murder of James Denmark.
Joseph B. Norton was executed at Jasper last Tuesday for the murder of James Denmark on the 4th of January last. At a very early hour people from every direction began to arrive. They came in all kinds of vehicles, and some walked. Every train also brought numbers of people, so that by 11 a. m. 1,500 or 2,000 persons surrounded the jail. Around the jail a plain plank fence had been built some time ago, probably ten feet high, planks upright and sharp-pointed. The crowd pressed hard against this fence and finally tore it down.

Norton's Crime.
The crime for which J. B. Norton was hanged was committed on the night of January 4, 1895, under circumstances that were highly sensational. Norton came to Hamilton county last fall from Georgia, although originally from South Carolina. He settled near Jasper and soon became very popular. Last December he wedded Miss Lizzie Daniels, the daughter of a well-to-do planter. On the night of the fourth of last January a dance was given in honor of the newly wedded couple by Mrs. Norton's father. A large number of young people were present and for a time everything went merrily.

Mrs. Norton had been the belle of the neighborhood and she was eagerly sought in the dance by her old admirer. Among the latter was young James Denmark, who, rumor said, was regarded favorably by Mrs. Norton before she married. Denmark begged Mrs. Norton to dance with him and she consented. Before the dance began Denmark gave his pistol to Norton to keep while he danced with Mrs. Norton. The dance began and Mrs. Norton and Denmark seemed to be carried away with one another, and Norton saw something occur between them that made him crazy with jealousy. As the couple circled near him in the mazes of the waltz, Norton tore his wife from the arms of Denmark. Norton then struck Denmark a violent blow in the face and, with Denmark's own pistol, shot him dead. The bullet struck Denmark in the neck, severing the jugular vein, and his life blood spurted over the ball room floor.

Norton made no effort to escape, claiming that Denmark had insulted Mrs. Norton and that the killing was justifiable. On the trial the defense sought to establish the insult, but failed. Mrs. Norton, in her testimony, stated that Denmark was very ardent in his attentions to her during the dance and she was not pleased with his manner.

When called on to define the insult Norton could not do it, stating that it was simply Denmark's manner to Mrs. Norton that had angered him. Norton might have escaped on even this showing had the state not brought out in the trial that he had two living wives, one in Georgia and one in South Carolina, at the time of his marriage to Miss Daniels. The evidence that he was a bigamist and had deceived Miss Daniels turned the tide against him and the jury brought in a verdict of guilty. Efforts were made to have the death sentence commuted to imprisonment for life, but to no avail.

"WILL BE A CALAMITY"

If the Government stops the Runnymede Experiment Station.
A few years ago the department of

agriculture in Washington established an experiment station at Runnymede, Narcoossee P. O., for the purpose of experimenting in the growth of sugar cane on peat and muck lands. It was also the purpose to manufacture the cane which grew into sugar, hence a well-equipped sugar house was constructed at a cost of about \$2,500. Unhappily, the gentleman in charge of the station did not have practical knowledge of the cultivation of the cane, and of the management of the peat and muck lands, hence his work was not a practical success. The secretary of agriculture, becoming discouraged at the results, decided not long since to discontinue the station. Hearing of this, Hon. Walter Glynn, of Sanford, president of the board of trustees of the agricultural college and experiment station, accompanied by President Clute, director of the Florida Experiment station, visited Runnymede station recently for the purpose of inquiring into the value of the peat and muck lands, and of examining what has been done at Runnymede station.

After a thorough investigation these gentlemen are strongly convinced that to abandon the work now is a calamity to Florida; as it seems to them that the expenditure of two or three thousand dollars each year for three or four years to come would lead to such success in the manufacture of sugar from these peat lands as would be of very great value to Florida, for it would show a practical side in the management of such lands, and would serve to lead industries and practical men to buy from twenty to thirty acres of these disclaimed lands where to establish homes for their families.

Colonel Glynn and Dr. Clute were so thoroughly convinced of this that they have written to Secretary Morton, begging him to continue the station at Runnymede for three or four years to come. It is strongly hoped that the secretary may be induced to reconsider his purpose to discontinue the station. This sugar work at Runnymede has in it such promise that the Florida experiment station would gladly enter upon it and conduct it, were it not that the funds which it requires for experimental work have been assigned to conducting work in other departments of investigation.

SAVE THE FISH.

Wanton Destruction of Food Species at Lemon City.

A correspondent writing from Grove City thus comments: A law was supposed to have been passed by the last legislature prohibiting the fishing with stop nets, but if such law was passed it fails to prohibit or from some cause is inoperative. Long nets fastened together are set in the shoal waters of Lemon bay, reaching for hundreds of yards parallel with the shore when the tide is high and the fish are feeding near shore. The nets have small meshes, and when the tide recedes inside are caught, and such are not in demand in the market at the time are thrown away to feed the buzzards and not into the bay.

In that way thousands of food fish are continually being destroyed. It is to the interest of the fishermen as well as to consumers that prohibitory laws can be enforced against such wanton waste of one of the chief food products of the state, for at the rate the fish have been killed on this coast for the past few years, fishing will soon cease to be a profitable business. The time given to bulwarks by the last legislature might have been employed to better advantage in the fishing interests.

FIREMEN OF FLORIDA.

They Will Hold Their Next Tournament at Key West.

The following, which will be of interest to firemen, has been issued: To the Members of the State Firemen's Association: The date and place of the next annual convention and tournament of this association has been fixed for January 22, 23 and 24, A. D., 1896, at Key West, Fla.

The convention has been postponed from November to the above date at the request of the Key West department and pursuant to a vote of a majority of all members.

Full programs with special rates via all transportation lines will be sent as soon as they can be prepared.

Please promulgate this information to all members of your department, and ask your local papers to make mention of the same. Respectfully and fraternally yours,
SILAS B. WRIGHT, Secretary.

TENNESSEE'S MONUMENTS.

The State Will Erect Five Elegant Ones at Chickamauga.

The Tennessee board of Chickamauga park commissioners have decided to erect five elegant monuments to her sons engaged in the Chickamauga battles, of which three will stand to the memory of her confederate dead, one to the troops in each branch of the service and one to the Tennesseeans in the union army—a cavalry monument. The monuments will cost \$2,000 each. Although Tennessee leads the list of states with fifty-eight commands engaged at Chickamauga, her appropriation is but \$10,000, hence the main work of commemoration on an adequate scale will have to be carried out at a later day.

Railway Clerks in Convention.

The first annual convention of the Railway Clerks' Benefit Association met in session at Chicago Wednesday. The annual report of the secretary showed a surplus of \$33,000 against \$13,000 during the past year. The association has 3,448 members, 300 of whom have been added during the year. Eleven assessments, aggregating \$58,000, were paid since the last report. There were 170 delegates in attendance.

Big Blaze at San Antonio.

Fire broke out Monday morning in the four-story furniture store of L. P. Peck & Co. at San Antonio, Texas. The entire stock was destroyed. Estimated loss \$75,000 with \$50,000 insurance. Damage to building about \$20,000, covered by insurance. The Alamo trunk factory adjoining was damaged to the extent of \$5,000 and the Texas Millinery Emporium Company suffered a loss of \$4,000.

The surface of any given quantity of gold may be extended 310,814 times by being properly beaten with the hammer.

The velocity of the earth at the equator, due to its rotation on its axis, is 1,000 miles per hour, or a mile in 3.6 seconds.

A gold dollar if beaten until its surface was enlarged 310,814 times (as noted above) would become a golden film not more than the 1-566,020th part of an inch in thickness.

The famous sacred Mohammedan flag enshrined at Constantinople, is said to be a portion of a silk night-shirt formerly worn by the great Mohammed himself.

It would take a line of cradles extending entirely around the globe to accommodate the 37,000,000 babies that are born into this world every year.

It is said that the largest diamond in the world was found a short time ago in the mines of Bahia de Pernau, Brazil. The gem is reported to weigh 3,100 carats, which is 2,129 carats heavier than the largest existing diamond.

A peculiar blunder occurred in the engraving of the plate from which the reverse side of the \$5 silver certificates was printed. It will be noted that on the back of these certificates are the fac-similes of several silver dollars. The third one of these from the left end of the certificate has the word "trust" spelled "trast." On all the others the word is properly spelled.

GREAT BOOK FREE.

When Dr. R. V. Pierce, of Buffalo, N. Y., published the first edition of his work, "The People's Common Sense Medical Adviser," he announced that after 600,000 copies had been sold at the regular price, \$1.50 per copy, the profit on which would repay him for the great amount of labor and money expended in producing it, he would distribute the next half million free. This number of copies has already been sold, he is now distributing, absolutely free, 500,000 copies of this most complete, reliable, and valuable common-sense medical-recipe book ever published—the recipient only being required to mail to him, at the above address, this little coupon with twenty-one (21) cents in one-cent stamps to pay for postage and packing only, and the book will be sent by mail. It is a veritable medical library, complete in one volume. It contains over 100 pages and more than 300 illustrations. The Free Edition is precisely the same as those sold at \$1.50 except only that the books are bound in strong manilla paper covers instead of cloth. Send now before all are given away. They are going off rapidly.

Which have you an eye to,
quantity or quality, when you buy something to make washing easy? If it's quality, you want Pearlina. In effectiveness, in economy, and above all in its absolute harmlessness, no matter how or where you use it, there's nothing to compare with this, the first and only washing compound.

What difference does the quantity make, after all? If you spend five cents or ten cents or a dollar for an aid to washing, don't you want the thing that will give you the most work, the best work, and the most certain safety for that amount of money? That thing is Pearlina.

Send Peddlers and some unscrupulous grocers will tell you "this is as good as" or "the same as Pearlina." IT'S FALSE—Pearlina is never peddled, and if your grocer sends you something in place of Pearlina, be honest—send it back.

WANTED

Bright Boys and Girls!

—TO—

Sell the New York Ledger Every Week.

Big Pay for Little Work.

The New York Ledger has had so many applications from boys and girls throughout the country wanting to sell the Ledger by the week, as well as by subscription for the year, we have decided to establish wide-awake young agents in every town in the country.

We Want an Active Worker in Every Town.

Hundreds of smart boys and girls in every locality have several hours' spare time each week.

Read Our Plan.

We want just such a person to work for us a little while each week selling Ledgers at 5 cents each—selling the old, reliable, original and best story paper published—the New York Ledger.

No Possible Risk.

Our young agents take no possible risk. We send a bundle of Ledgers every week, and they sell them like hot cakes at 5 cents each. Every one wants the New York Ledger as soon as given an opportunity to examine and read a copy of it. It will only be necessary for an agent to show a likely reader our offer of

\$1,000 in Cash Prizes to Readers

Readers

And a regular reader will be secured on the spot. Each agent should read carefully the terms of the \$1,000 in Cash Prizes given to readers who send the best explanation of the mystery of Miss Florence Warden's wonderfully interesting story beginning in this week's Ledger, dated Sept. 1, entitled "The Mystery of the Inn by the Shore." Each agent will be entitled to compete for the \$1,000 in Cash Prizes.

The Ledger Free.

If the postmaster of a smart boy or girl to sell the Ledger every week in his town, we will put an extra Ledger in the agent's bundle each week to be delivered free to the party appointing the agent so long as the agent sells the Ledger.

Send us the name of a smart boy or girl at once. Have them fill out this coupon and send it at once:

I hereby agree to act from date as agent for the New York Ledger, and to receive same in full, and to sell them like hot cakes at 5 cents each, and to keep a full record of sales, and to send me each week a full report of sales, and to keep all unsold copies, to be returned as instructed.
